

The Aurora Proline HD cases has been revised and presents some interesting new details:

- ✓ New size, the 105cm, is now available - thanks to the addition of a few centimetres this size will allow you to store most of the new compound bows;
- ✓ The addition of a plastic protection to the bottom of the case in order to protect this particularly stressed point of the case from the fabric wear out;
- ✓ New replaceable wheels;
- ✓ Both the compound models are preset for the new back carrying system;
- ✓ The compound models are equipped with two internal straps to block the bows, in addition to the divider flap;
- ✓ The Junior model, dedicated to recurve bow shooters, comes standard equipped with a new back carrying system that can be used to carry the case on your back or in a either way back/wheels.
