

The Shark quivers line comes in three models: Proline, Techno and Dynamic.

Regarding the dynamic quiver, even though it doesn't offer all the features sported by the top line models, it is a high quality / price ratio product, a quiver of a new and aggressive design with contrasting color stitchings and provided with a matching color belt.

Available for right or left handed shooters, in three different colors.

It has the following main features:

- √ Wide pocket on the main body.
- √ The characteristic shark gill design of the pocket.
- √ Two independent pockets in the upper part.
- √ Flaps for the backnumber positioning.
- √ Four distinct dividers for the arrows with the tubes.
- √ Belt in matching color, with a good rigidity.
