

Besides the top of the line Proline model, Aurora presents the Techno Shark quiver, that differs from the Proline mainly for the use of tubes in the arrow dividers.

The main feature of this quiver is the lightweight it has, which is lighter than the Proline model, and the lower price.

Available for right and left hand shooters, in four different color combinations.

The main characteristics are:

- √ Wide pocket on the main body, with two internal pockets, one with zipper;
- √ Three pockets with the characteristic shark gill design, one of which with pen holder;
- √ Two independent pockets in the upper part;
- √ T-shaped pocket for the bow square in the back
- √ Flaps for the backnumber positioning;
- √ Four distinct dividers for the arrows with the tubes;
- √ Belt with stiffening plastic insert and adjusting system with velcro straps;
- √ Clip for accessories.

The market offers a lot of quivers, but only Aurora offers you so much in a single quiver.
