RAYZR FEATHERS

Gateway developed a new feather model starting of a shield cut shape made by lowering the profile and shortening the feather down to 2". This simply gives birth to the First Modern Concept Feather.

This new product was tested in hunting, where it gained a broad consensus thanks to the quietness of the flight as well as in target shooting for its ability to stabilize even the largest fixed blade broadheads.

The sensation of great stabilization of the arrow is perfectly sensed in target shooting especially at medium-short distances, where its reduced dimensions make the loss of speed of the arrow, when leaving the bow, almost negligible.

Rayzr feathers are thus a good alternative to 3" or 4" feathers commonly used especially in indoor shooting.

The new Rayzr feathers are available in 50 count packs with 26 color feathers and 24 white ones.

You can choose the following color combinations:

- BARRED RED / WHITECode 53D258
- BARRED GREEN / WHITECode 53D260
- BARRED ORANGE / WHITECode 53D261
- BARRED BLUE / WHITECode 53D262
- TRE RED / WHITECode 53D264
- TRE GREEN / WHITECode 53D266
- TRE ORANGE / WHITECode 53D267
- TRE BLUE / WHITECode 53D268
